

Native Bee Workshop

Only ONE workshop each year!
Book early - maximum 35 people

Local Native Bee expert, Dan Smailes will tell us all about:

- the different types of Native Bees and the vital work they do in pollinating plants in our gardens.
- how to take care of them, how to split the hive each year, and collect the honey they produce.

Date Sunday 10 December, 2017

Time 10am – 1pm

Venue Kimbriki Eco House & Garden Learning Centre

within Kimbriki Resource Recovery Centre,
Kimbriki Road, Ingleside

enter via the weighbridge and speak to the operator before proceeding

Cost \$25 per person

Bookings <https://www.trybooking.com/SPZK>

Maximum 35 attendees, please book early

Dan Smailes runs Sydney Native Bees and is a true indigenous biodiversity advocate. Since discovering the essential link between native plant and endemic pollinator, Dan has solely focused his study on the essential role of native bees in Sydney's suburban and industrialised environment. Through his recent contribution at Permaculture Northern Beaches and collaboration with Wildthings NSW, he has developed a unique understanding of 'our' *Tetragonula Carbonaria* colony behaviour, seasonal instinct and social patterns endemic to this region.
